# MESSAGE FROM THE MANAGEMENT

It gives me great pleasure to welcome you to our Skylark World School. Our children are our future and take a pride of place in our culture. Our culture emphasizes education as one of the most significant determinants of success. Education of course has to be all-round and include academic, co-curricular and life skills. Education also needs to be supplemented with strong values to develop character and a well-rounded personality. Students spend roughly one-third of their time each in school, at home and in sleep. The role of the school and teachers as well as the parents and grandparents can never be overemphasized. All have a crucial role to play in the development of knowledge, personality, and character of the student-our future! With state-of-the-art facilities and infrastructure and limited class size for individual attention, well supported by a team of knowledgeable, trained, and dedicated sponsors, management, teachers, and staff, we at Skylark World School, provide the best of education that is of highest quality and yet affordable. We at Skylark World School encourage students to dream and aspire, equip them to face challenges and we dare them to soar! We look forward to your support in our endeavour and make our school one of the best schools in Lucknow.

‘Education’, a word that we come across most commonly. Yet, it’s true meaning is of paramount importance. Unfortunately, there still are many educational institutions, that mistake education for mere learning with the purpose of scoring well. In a world where vices are taking over values, humans are losing humanness and actions are becoming overly money-oriented, crime is on the rising side. We need to understand that education is a responsibility because it is through it, that we can develop young adults who would contribute to humanity, follow their passions and lead a more purposeful life for themselves and their fellow beings. The role of character is what determines the life graph of every individual. Hence, education must be such that, it instills a hint of good values amalgamated with a curiosity and a love for learning, in every child. The mind is not a vessel to be filled, but a fire to be kindled. Educating a child is like putting wet clay into a mould. Let us do it with a deeper insight and responsibility. We are not only raising a child, but also building a nation and a future.
